**FYI Miami: RAIL CARS ON TRACK**

A county committee has forwarded to the full Miami-Dade Commission a plan to spend \$11.2 million for four more rail cars for the MIA Mover, the automated rail link between Miami International Airport and the nearby Miami Intermodal Center. The four cars, to be purchased from Mitsubishi Heavy Industries America, would bring the system to capacity. The rail line serves a booming hub for 16 rental car companies at the 3.4-million-square-foot intermodal center. The added rail cars are to be funded by airport revenue bonds. Last year 39.5 million passengers passed through the airport, up more than 3% from the prior year. The full commission is to decide whether to purchase the four rail cars.
